

# How to share your Apps over Air for Testers

## Get UDID of iOS Devices

1. Have users visit <http://udid.io>
2. send UDID to [c.konkol@rockvalleycollege.edu](mailto:c.konkol@rockvalleycollege.edu)
3. Developer – add new UDIDs to team on Apple Dev

## Create Over the Air Link [ [Watch Over the Air Testing Podcast](#) ]

1) Refresh Provisioning Profiles from XCode.

1. Xcode > Preferences > Account > View Details > Refresh (button)
2. Close out of Xcode Preferences
3. Select Project > General > Team [Rock Valley College (Computer Information Systems)]
4. Test and Compile

2) Create OTA link

### Install iPA Creator

1. Visit <https://github.com/ioscourse/shenzhen>
2. Follow Install Steps
  1. Start Terminal App (Go > Utilities > Terminal)
  2. `gem install Shenzhen`
  3. `cd /Users/charleskonkol/Documents/strenstrom`
3. Go to Xcode Project Path
  1. Syntax: `cd /path/to/iOS Project/`
  2. Example:

```
cd /Users/charleskonkol/Documents/strenstrom
```

3. Build .iPA (from terminal)

```
$ ipa build
```

### Install AppSender & send to testers

1. Visit <https://www.appsendr.com/>
2. Download and install app
3. Click on AppSendr > Select App > Select .ipa file from project folder
4. Send link URL to testers
